

On-the-Go Application Tank

The Trinity Tank doesn't require a trailer or truck bed for hauling. It can be used *on or off* the vehicle during application use and allows the applicator to use the truck bed for other equipment.

The application tank has a 40-ft hose, puncture-proof back tires, and a special tow/hitch adapter.

The application tank has a tough, easy-to-clean 30-gallon tank with jet agitation. It is equipped with a 5.5 Hp engine and diaphragm pump with a pressure range of 0 to 360 psi.
